**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by Matsushima et al., US No. 6,401,322 ("Matsu").

Matsu discloses sealing ring comprising a bearing ring (104), sleeve (102) fastened to the bearing ring.

The sleeve has a bulbous portion (at the end of 102) at a free end and a least one closed lip (contacting the shaft) shaped projection extending radially from the bulbous portion. The projection being closed and surrounding the shaft in a sealed manner (FIG. 23).

***Claim Rejections - 35 USC § 103***

II. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3676

A. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsu in view of Hosokawa et al., US No. 6,764,080 ("Hoso").

Matsu discloses substantially the same seal as applicant except for the covering.

Hoso discloses the covering provided with a plurality of ribs (i.e. the first right angle bend and the second bend near reference numeral 51) distributed over a periphery of the covering in order to shield against gas.

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Matsu as taught by Hoso in order to shield the seal against gas (Col. 18, line 30)

III. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Allowable Subject Matter***

IV. Claims 1-3, 5-9 and 11-22 are allowed.
